

1. The max displayed depths levels of folders is 4. When it has more than 4 levels, the display method would switch to drop-down with clickable breadcrumbs and back button utilizing history for user friendly navigation.

3. As a good practice, the text-search function would not be handled in the frontend. It would just send a request to server side for better search experience.

Name	×	Headers	Payload	Preview	Response	Initiator	Timing
<input type="checkbox"/> search?aws-s3-bucket-lid=default&keyword=llll	▼	Query String Parameters		view source	view URL-encoded		
		aws-s3-bucket-lid: default					
		keyword: llll					

4. It is designed to show totals in right bottom corner when under a certain folder, and to show hint message when viewing a file.
